HELLO!

Carla Jefferson

Instructional Technology Coordinator

Darlington County School District

Learning Objectives

- Discuss how podcasting can enhance the learning experience.
- Highlight tools that can allow you to create podcasts and integrate audio into lessons
- The purpose and power in educational playlists.

What's Your Podcasting

Podcasting in the Classroom

What Is a Podcast?

A podcast is an audio or video transcription of information that can be downloaded and played anywhere and anytime.

Podcasts are recorded using software or online recording programs, exported to a digital warehouse (such as iTunes or Spotify), and then downloaded by anyone who searches for that topic or anyone who has a direct link to the podcast itself.

Podcasting In The Classroom

- Providing content in a fun and engaging way
- Providing critical links between content areas
- Synthesize learning through podcast creation
- Communicate with a variety of stakeholders

Creating Audiobooks While Learning at Home

Recommendations for Audio Books

Where possible, making readings available on undifferentiated general-use platforms should be avoided, -- recognizing that this may be impossible under emergency conditions.

In normal times, the “safest” choice may be a Learning Management System with technological features that limit access to enrolled students, this is not by any means a necessity.

Recommendations for Audio Books

School-based or teacher-maintained websites are another option, as are dedicated channels on YouTube or a similar platform.

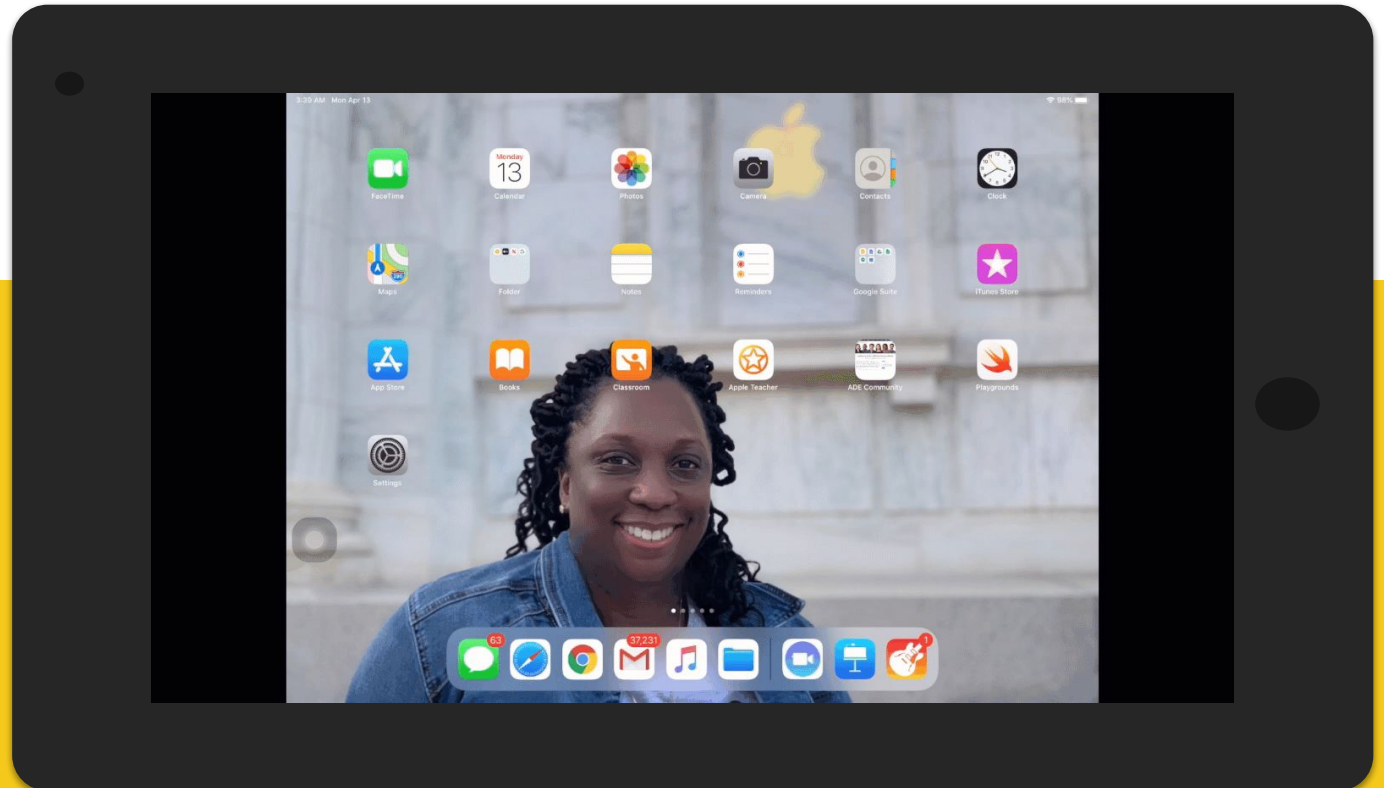

Having made an appropriate choice, teachers and schools are not required to monitor the use of whatever content-delivery option they selected.

Tools of the Trade

GARAGEBAND

Garageband is free on all Apple Products. Using it on iPad is one of the easiest ways to record.

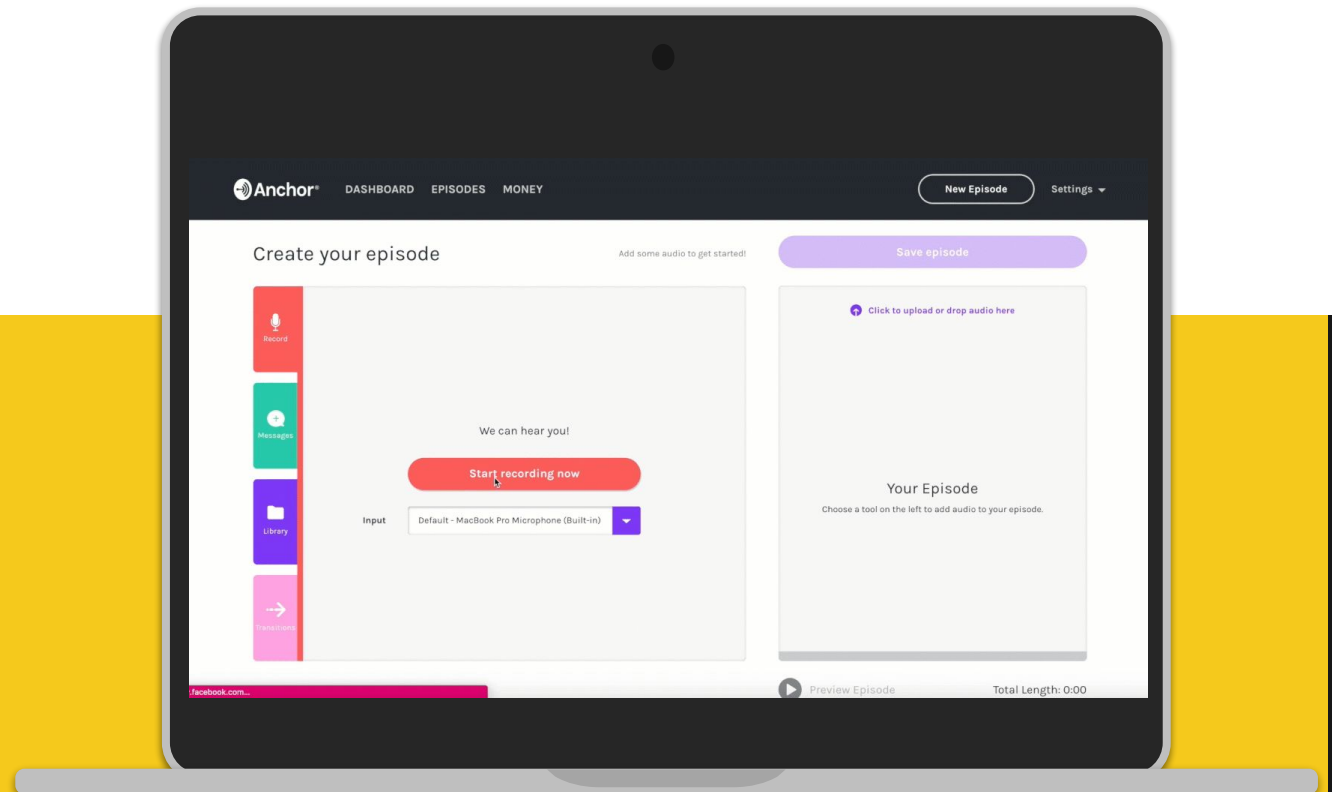

ANCHOR

Drag and drop audio elements directly into your episode and if you've never worked with audio before this can make piecing together an episode way less daunting.

Available on multiple platforms.
